

THE D2C REALITY

Your ops team is doing a **robot's job.**

Spreadsheets for orders. WhatsApp for vendors. Email for returns. Sound familiar?

THE NUMBERS

Most D2C brands are running blind.

73%

of D2C order ops still run on spreadsheets & chat groups — not a system.

WHAT "RUNNING BLIND" MEANS

No reality check. No visibility. No tracker.

No profit reality check

Revenue looks fine — margins after returns & penalties don't

UNTRACKED

No view of operations capacity

No one knows how many orders the team can actually handle today

UNTRACKED

Unassigned & pending tasks pile up

Orders, exchanges & vendor follow-ups sit with no clear owner

UNTRACKED

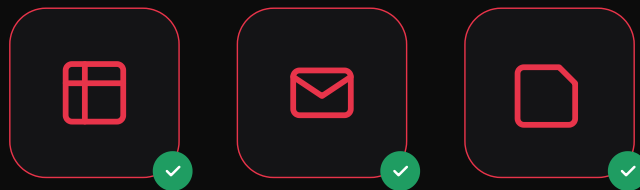

No performance tracker

No record of who's fast, who's slow, who's actually delivering

UNTRACKED

THE FIX

Antortiq replaces **all of it** with one system.

LET'S BE CLEAR

We're not what you think.

×

Not a generic agency

×

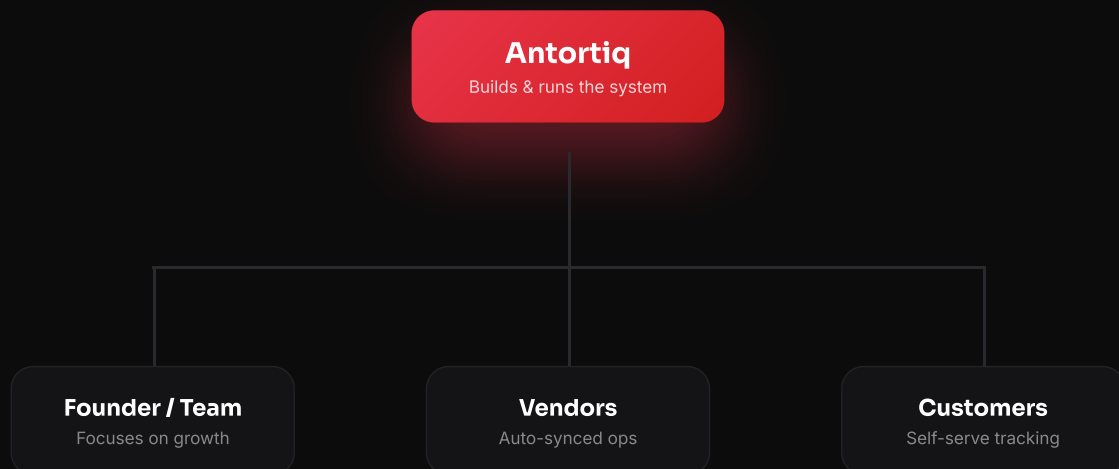

Not an off-the-shelf SaaS

✓

An engineering team that builds your system

HOW WE FIT IN

The engineering team you don't have to hire.

ONE TEAM, EVERY LAYER

Backend. Automation. AI. UI.

Backend Portals

Admin systems, APIs, databases

Workflow Automation

Orders, settlements, alerts

AI Agents

Support, ops copilots

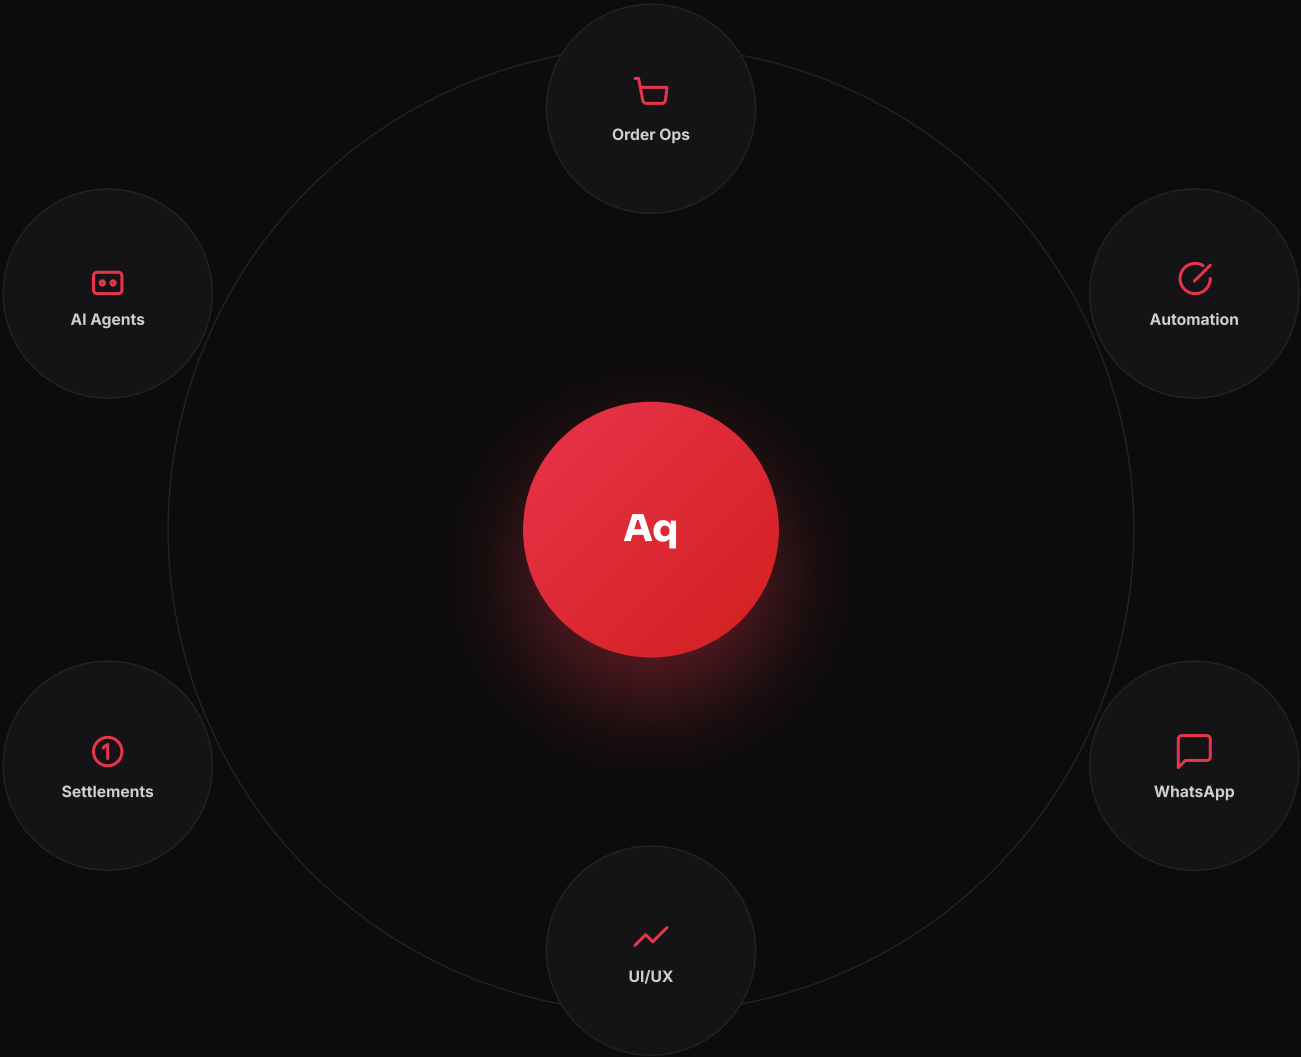

Product UI/UX

What your customers see

THE CAPABILITY MAP

Six systems. One operations engine.

HOW WE SHIP

Manual to automated in 4 weeks.

THE OUTCOME

Your stack, **rebuilt.**
