

AI Agents **Built For** D2C Operations.

Support bots and ops copilots wired into your live order data — not a chatbot bolted on top.

Your Order Data **Should Stay Yours.**

We design systems with controlled access, role-based usage, and secure data handling — no third-party panel locking you out.

We Don't Sell **Templates.** We Build Systems.

Antortiq designs, builds, and customizes around how your business actually runs — not the other way around.

Manual Ops **Don't Scale.** Automation Does.

As orders grow, manual processes create delays, errors, and dependency on people. We replace repetitive work with systems built for scale.

Every Order Stage. **One Branded Email.**

From "Order Placed" to "Exchange Done" — ten branded touchpoints, fired automatically, every time.

Settlements That **Run** **Themselves.**

Auto commission splits, one-click payables, and a settlement history that finally replaces the spreadsheet.
