

📁 Marketplace Operations Platform · Prepared for Crep Dog Crew

Everything traditional providers leave manual — we automate.

A point-by-point look at where today's plug-in tools stop, and what a purpose-built operations platform does instead — tuned to how Crep Dog Crew actually runs.

WHERE TODAY'S TOOLS STOP

Same checklist, very different ceiling.

Most plug-in panels handle the basics. Here's exactly where they stop — and what Antortiq does instead, built around how Crep Dog Crew already runs.

TODAY

Basic split, no custom rules

ANTORTIQ

Per-vendor stage flow, auto-routing, full multi-vendor split

Email Comms

TODAY

Generic, unbranded

ANTORTIQ

Branded for confirm, dispatch, delay, deliver, settle, penalty, OOS, returns

Late Dispatch

TODAY

No enforcement

ANTORTIQ

Auto window tracking, warnings, penalty triggers, audit trail

Settlements

TODAY

Manual, spreadsheets

ANTORTIQ

One-click, auto commission split, auto move-to-payable

Analytics

TODAY

Static, delayed

ANTORTIQ

Real-time dispatch/delivery/RTO, vendor leaderboard

Order Tracking

TODAY

Manual AWB entry

ANTORTIQ

Auto courier sync, live status both sides

Returns/Exchanges

TODAY

ANTORTIQ

Fully automated, hands-off end to end

Customization

TODAY

Fixed plug-in

ANTORTIQ

Built around your rules, stages, brand

WHAT YOU GET

Eight systems, one platform.

Not eight separate tools bolted together — one console that owns the whole order lifecycle.

01

Order Flow Engine

Auto vendor-split orders moved through your defined stage pipeline (New → Confirmed → Ready → Dispatched → Delivered); COD, prepaid & partial-payment logic built in.

02

Operations Console

One screen for every order & vendor — vendor-wise fulfilment view, bulk actions, manual overrides, role-based access.

03

Custom Email Automation

Branded emails for every event: confirmed, dispatched, delayed, delivered, settled, penalty, out-of-stock, returns.

04

Dispatch Penalty Engine

Configurable dispatch-window per vendor, auto warning → penalty escalation, full audit log for disputes.

05

Auto commission & payable calculation, one-click move-to-payable, full settlement history — no manual push.

06**Real-Time Analytics**

Live dispatch/delivery/RTO rate, vendor performance leaderboard, revenue & payment-mode breakdown.

07**Auto Order Tracking**

Courier API integration, live tracking page for customers, out-for-delivery & delay alerts — zero manual AWB entry.

08**Returns & Exchanges**

Fully automated request → approval → pickup → resolution — your team doesn't need to know it happened until it's done.

TUNED TO YOU

Not a fixed product — your rules, built in.

STAGES**Your pipeline**

Stage flow & dispatch windows matched to how vendors run today.

BRANDING**Your brand**

Every email & page white-labelled to Crep Dog Crew.

COMMISSION**Your split**

Per-vendor/category commission & shipping rules built in.

COURIERS**Your partners**

Wired to whichever courier network(s) you already use.

ACCESS**Your team**

Admin, ops & vendor roles matched to your structure.

WHAT ANTORTIQ CAN DO FOR YOU

Beyond this proposal — the full studio.

The platform above is the core ask. Everything else below is what we bring to the table once we're building together.

BUILT INTO THIS PROPOSAL

Penalty Engine Automation

Configurable dispatch windows, auto warning → penalty escalation, and a full audit trail your vendors can't dispute.

- Auto Escalation
- Audit Trail

BUILT INTO THIS PROPOSAL

Settlement & Commission Engine

One-click vendor payouts, auto commission splits, and a settlement history that replaces the spreadsheet entirely.

- Auto Split
- Payables

BUILT INTO THIS PROPOSAL

Courier & Logistics Sync

Live integration with your courier partners — auto AWB sync, delay alerts, and a tracking page customers actually trust.

- Courier API
- Live Tracking

D2C & Ecommerce Ops Management

The broader ops layer — order tracking, returns/exchange, vendor fulfilment — for every brand under the Crep Dog Crew umbrella.

- Order Tracking
- Vendor Ops

Web & Product UI/UX

Storefronts, dashboards, and customer-facing pages designed and built in-house — no template feel, ever.

- Design Systems
- React

AI Agents & Integrations

Support bots and ops copilots wired into your live order data — not a chatbot bolted on top, an agent that actually knows your business.

- RAG
- LLM APIs

WhatsApp & Email Automation

Branded lifecycle messaging on autopilot — order placed to delivered, exchange updates, and reorder nudges.

- WhatsApp API
- Lifecycle Email

Backend Portals & Admin Systems

Multi-tenant dashboards and internal tools built on rock-solid APIs, for whoever runs the business day to day.

- Node.js
- RBAC

Cloud Infrastructure & DevOps

Scalable, secure architecture with CI/CD and monitoring from day one — built so it doesn't need a rewrite at 10x volume.

NOT JUST A PITCH

We've already shipped systems like this.

This isn't a concept — it's the same engine running in production today. Here's the actual customer-facing pages and emails, screenshotted from the live build.

CUSTOMER-FACING

Live Order Tracking Page

A screenshot of a web browser showing the 'YOUR BRAND' order tracking page. The browser address bar shows 'track.yourbrand.com'. The page features a progress bar with four stages: Confirmed, Ready, Transit, and Delivered. Below the progress bar, it displays the courier information: 'COURIER - AWB Delhivery - 8012003045'. The order items are listed as 'FOURMEN — 001 CORE' (Qty 1 - Size S) and 'Oversized T-Shirt' (Qty 1 - Size L). The vendor is listed as 'FOURONE'.

PRE-DISPATCH

Confirm Order Page

A screenshot of a web browser showing the 'Confirm Order Page' at 'dashboard.yourbrand.com/confirm-order'. The page displays the order number '#2339' and the total amount '₹1,486.00'. The order item is 'FOURMEN — 001 CORE' (Size S - Qty 1). A section titled 'Why we ask for a small confirmation' explains that COD orders are sometimes placed by mistake or refused at the door, and a tiny confirmation helps ensure the customer really wants the order. Below this, the 'AMOUNT PAYABLE ON DELIVERY' is shown as '₹1,387.00'. There are two main payment options: 'Pay ₹99 & Confirm Order' and 'Pay in full & save more'. The 'Pay in full & save more' option shows a total of '₹1,337' (saving ₹149) and a 'Pay ₹1,337 & Go Prepaid' button.

SELF-SERVE

Return / Exchange Request

A screenshot of a web browser showing the 'Return / Exchange Request' page at 'track.yourbrand.com/2339'. The page has two main sections: 'Exchange' (Swap for a different size or variant) and 'Return' (Return items for a refund or credit). The 'Exchange Request' section is active, showing the order item 'FOURMEN — 001 CORE' (Size S - Qty 1). A dropdown menu for 'Select exchange size/variant' is set to 'Size — M'. A '₹199 Processing Fee' is displayed at the bottom.

BEFORE WE GO FURTHER

This is just the starting point.

Everything above is roughly 30% of what the platform can actually do. The deeper layer — advanced automation, vendor scoring, workflows built specifically for Crep Dog Crew — is best shown live.

■ Shown in this brief — 30%

■ Reserved for the live demo — 70%

NEXT STEP

See it running, not just described.

A focused 20–30 minute live demo — real order flows, the penalty engine, settlements, and everything we didn't put on paper.

And don't worry about the cost — this isn't another **₹15–20k/month** panel subscription. Antortiq is a **one-time cost**, a small fraction of what you'd pay in a single year for old-generation panels.
