

MARKETPLACE OPERATIONS PLATFORM

One panel to run every vendor, every order, every payout.

A purpose-built operations system for multi-vendor Shopify marketplaces — covering order flow, dispatch accountability, settlements, and real-time visibility, with every layer tuned to how you actually run La-Fetch.

Prepared exclusively for La-Fetch

Where off-the-shelf tools stop

01 / 05

Traditional logistics/marketplace plug-ins get a multi-vendor store running. They were not built to run one — every layer below is something they hand back to you as a manual task.

CAPABILITY	TYPICAL PLUG-IN TODAY	ANTORTIQ
Order Routing	Basic vendor split, no custom rules	Configurable stage flow per vendor, auto-routing, multi-vendor order splitting handled end-to-end
Email Communication	Generic, unbranded templates	Fully custom, branded emails for every event — confirmation, dispatch, delay, delivery, settlement, penalty alerts, low-stock/OOS notices, return & exchange updates — every touchpoint covered, nothing left generic
Late Dispatch	No enforcement mechanism	Automated penalty engine — dispatch-window tracking, warnings, penalty triggers, full audit trail
Settlements	Manual calculation, spreadsheets	One-click settlement runs, auto commission split, vendor-wise payable view — orders move to payable automatically, no manual push needed
Analytics	Static, delayed reporting	Real-time dashboards — dispatch rate, delivery rate, RTO, revenue, vendor performance
Order Tracking	Manual AWB entry & status checks	Auto-tracking via courier integration, live status sync back to customer & vendor
Returns / Exchanges	Email/spreadsheet based	Completely automated — request → approval → pickup → resolution runs on its own; your team doesn't even need to know an exchange was placed until it's already done

Customization

None — fixed plug-in behavior

Built around your rules, your stages,
your brand

01

Order Flow Engine

Every order auto-split by vendor, moved through a clear stage pipeline you define.

- New → Confirmed → Ready → Dispatched → Delivered
- Multi-vendor orders handled independently per brand
- COD, prepaid & partial-payment logic built in

02

Operations Console

One screen for admin to see and act on every order, every vendor.

- Vendor-wise order & fulfilment view
- Bulk actions & manual overrides
- Role-based access for ops staff

03

Custom Email Automation

Every customer & vendor touchpoint, branded and automatic.

- Order confirmed, dispatched, delayed, delivered
- Vendor-specific dispatch & payout emails
- Fully white-labelled templates

04

Dispatch Penalty Engine

Vendors held accountable to dispatch SLAs — automatically.

- Configurable dispatch-window per vendor
- Auto warning → penalty escalation
- Full penalty audit log for disputes

05

Easy Settlements

Move from "order delivered" to "vendor paid" in one click.

- Auto commission & payable calculation
- One-click move-to-payable workflow
- Full settlement history per vendor

06

Real-Time Analytics

Know what's happening today, not last week.

- Dispatch rate, delivery rate, RTO rate
- Vendor performance leaderboard
- Revenue & payment-mode breakdown

07

Auto Order Tracking

AWB-to-delivery, tracked without anyone touching a spreadsheet.

- Courier API integration, auto status sync
- Live tracking page for customers
- Out-for-delivery & delay alerts

08

Returns & Exchanges

Completely automated — runs on its own, end to end.

- Request → approval → pickup → resolution, no manual steps
- Exchange variant selection built in

- Your team doesn't need to know it happened until it's done

Built around how La-Fetch actually runs

03 / 05

This isn't a fixed product you adapt your operations to. We tune the platform to your rules.

STAGES

Your fulfilment pipeline, not a generic one

Order stages, dispatch windows, and penalty thresholds configured to match how La-Fetch's vendors actually operate today.

BRANDING

Every email, every page — La-Fetch, not us

Customer and vendor-facing communication fully white-labelled to your brand, tone, and domain.

COMMISSION

Your commission structure, built in

Per-vendor or per-category commission logic, shipping splits, and payable rules configured exactly as you run them.

COURIERS

Your courier partners, connected

Auto-tracking wired to whichever courier network(s) La-Fetch already works with — no forced migration.

ACCESS

Your team's roles, respected

Admin, ops, and vendor-level access configured around how your team is actually structured.

BEFORE WE GO FURTHER

This is just the starting point

Everything on the previous pages is roughly 30% of what the platform can actually do. We've kept this proposal short and deliberately surface-level — the deeper layer (advanced automation, vendor scoring, custom workflows built specifically for La-Fetch) is best shown live, not written down.

SHOWN LIVE

NEXT STEP

See it running, not just described

We'd like to invite you to a focused 20–30 minute live demo — we'll walk through real order flows, the penalty engine, settlements, and the things we haven't put on paper at all.

And don't worry about the cost — this isn't another **₹15–20k/month** panel subscription. Antortiq is a **one-time cost**, a small fraction of what you'd pay in a single year for the old-generation panels out there.

Reply to this proposal or reach out directly to schedule a time that works for your team.
