

📁 Marketplace Operations Platform · Prepared for DAWNTOWN

Everything traditional providers leave manual — we automate.

A point-by-point look at where today's plug-in tools stop, and what a purpose-built operations platform does instead — tuned to how DAWNTOWN actually runs.

WHERE TODAY'S TOOLS STOP

Same checklist, very different ceiling.

Most plug-in panels handle the basics. Here's exactly where they stop — and what Antortiq does instead, built around how DAWNTOWN already runs.

TODAY

Basic split, no custom rules

ANTORTIQ

Per-vendor stage flow, auto-routing, full multi-vendor split

Email Comms

TODAY

Generic, unbranded

ANTORTIQ

Branded for confirm, dispatch, delay, deliver, settle, penalty, OOS, returns

Late Dispatch

TODAY

No enforcement

ANTORTIQ

Auto window tracking, warnings, penalty triggers, audit trail

Settlements

TODAY

Manual, spreadsheets

ANTORTIQ

One-click, auto commission split, auto move-to-payable

Analytics

TODAY

Static, delayed

ANTORTIQ

Real-time dispatch/delivery/RTO, vendor leaderboard

Order Tracking

TODAY

Manual AWB entry

ANTORTIQ

Auto courier sync, live status both sides

Returns/Exchanges

TODAY

ANTORTIQ

Fully automated, hands-off end to end

Customization

TODAY

Fixed plug-in

ANTORTIQ

Built around your rules, stages, brand

WHAT YOU GET

Eight systems, one platform.

Not eight separate tools bolted together — one console that owns the whole order lifecycle.

01

Order Flow Engine

Auto vendor-split orders moved through your defined stage pipeline (New → Confirmed → Ready → Dispatched → Delivered); COD, prepaid & partial-payment logic built in.

02

Operations Console

One screen for every order & vendor — vendor-wise fulfilment view, bulk actions, manual overrides, role-based access.

03

Custom Email Automation

Branded emails for every event: confirmed, dispatched, delayed, delivered, settled, penalty, out-of-stock, returns.

04

Dispatch Penalty Engine

Configurable dispatch-window per vendor, auto warning → penalty escalation, full audit log for disputes.

05

Auto commission & payable calculation, one-click move-to-payable, full settlement history — no manual push.

06

Real-Time Analytics

Live dispatch/delivery/RTO rate, vendor performance leaderboard, revenue & payment-mode breakdown.

07

Auto Order Tracking

Courier API integration, live tracking page for customers, out-for-delivery & delay alerts — zero manual AWB entry.

08

Returns & Exchanges

Fully automated request → approval → pickup → resolution — your team doesn't need to know it happened until it's done.

TUNED TO YOU

Not a fixed product — your rules, built in.

STAGES

Your pipeline

Stage flow & dispatch windows matched to how vendors run today.

BRANDING

Your brand

Every email & page white-labelled to DAWNTOWN.

COMMISSION

Your split

Per-vendor/category commission & shipping rules built in.

COURIERS

Your partners

Wired to whichever courier network(s) you already use.

ACCESS

Your team

Admin, ops & vendor roles matched to your structure.

WHAT ANTORTIQ CAN DO FOR YOU

Beyond this proposal — the full studio.

The platform above is the core ask. Everything else below is what we bring to the table once we're building together.

BUILT INTO THIS PROPOSAL

Penalty Engine Automation

Configurable dispatch windows, auto warning → penalty escalation, and a full audit trail your vendors can't dispute.

Auto Escalation

Audit Trail

BUILT INTO THIS PROPOSAL

Settlement & Commission Engine

One-click vendor payouts, auto commission splits, and a settlement history that replaces the spreadsheet entirely.

Auto Split

Payables

BUILT INTO THIS PROPOSAL

Courier & Logistics Sync

Live integration with your courier partners — auto AWB sync, delay alerts, and a tracking page customers actually trust.

Courier API

Live Tracking

D2C & Ecommerce Ops Management

The broader ops layer — order tracking, returns/exchange, vendor fulfilment — for every brand under the DAWNTOWN umbrella.

Order Tracking

Vendor Ops

Web & Product UI/UX

Storefronts, dashboards, and customer-facing pages designed and built in-house — no template feel, ever.

Design Systems

React

AI Agents & Integrations

Support bots and ops copilots wired into your live order data — not a chatbot bolted on top, an agent that actually knows your business.

RAG

LLM APIs

WhatsApp & Email Automation

Branded lifecycle messaging on autopilot — order placed to delivered, exchange updates, and reorder nudges.

WhatsApp API

Lifecycle Email

Backend Portals & Admin Systems

Multi-tenant dashboards and internal tools built on rock-solid APIs, for whoever runs the business day to day.

Node.js

RBAC

Cloud Infrastructure & DevOps

Scalable, secure architecture with CI/CD and monitoring from day one — built so it doesn't need a rewrite at 10x volume.

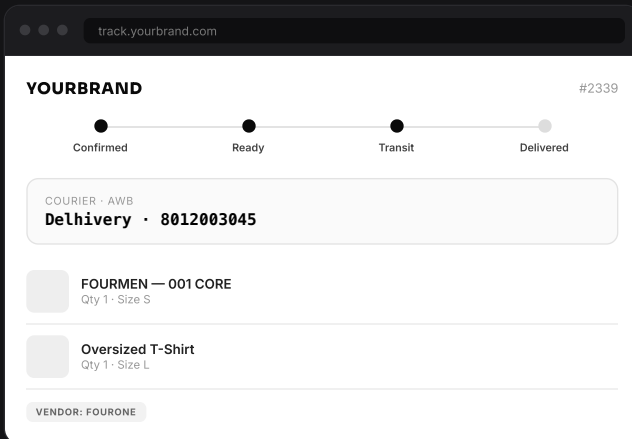

NOT JUST A PITCH

We've already shipped systems like this.

This isn't a concept — it's the same engine running in production today. Here's the actual customer-facing pages and emails, screenshotted from the live build.

Why we ask for a small confirmation
COD orders are sometimes placed by mistake or refused at the door. A tiny confirmation helps us know **you really want this order**. It's **not an extra charge**; it's deducted from your final bill.

INTERNAL AI BRAIN

AI sees stuff you can't imagine doing manually.

It quietly scans every order, tag, and cancellation in the background and surfaces patterns no ops team would ever catch by hand.

● WATCH

Regional Tag Cluster

"Bad Address" is disproportionately coming from Assam

7 of 12 orders tagged "Bad Address" this week are from Assam, which only accounts for <1% of total order volume — about 3.4× its expected share.

● WATCH

Cancellation Hotspot

Gujarat (state) cancellation rate is 33% vs 10% overall

2 of 6 orders from Gujarat were cancelled this period.

● WATCH

Repeat RTO Customers

6 customers with 2+ RTO orders in the last 90 days

Hamza Talha — 8340303018: #1875, #1555, #1554 (3 RTOs) · Sam Kumar — 8837801031: #1870, #1680, #1577 (3 RTOs) · Chintu Meena — 6376888406: #2140, #2101 (2 RTOs)

AI SALES ASSISTANT

The same brain talks to your customers too.

A live chat agent wired into your catalog — recommending products, surfacing collections, and helping customers check out, without a human typing a word.

BEFORE WE GO FURTHER

This is just the starting point.

Everything above is roughly 30% of what the platform can actually do. The deeper layer — advanced automation, vendor scoring, workflows built specifically for DAWNTOWN — is best shown live.

- Shown in this brief — 30%
- Reserved for the live demo — 70%

NEXT STEP

See it running, not just described.

A focused 20–30 minute live demo — real order flows, the penalty engine, settlements, and everything we didn't put on paper.

And don't worry about the cost — this isn't just replacing another **₹15–20k/month** panel subscription. We can also eliminate a lot of the third-party charges stacked on top of it — email providers, customer support tools, return/exchange providers — and fold them into one **single one-time cost**, a small fraction of what you'd pay in a single year across all those separate subscriptions.
